

Les Encens Rares®

These pure incenses are made by craftsmen
in a small village called Huaï-Thalaeng
at 350 km from Bangkok in Thailand ,
closed to the Cambodia border .

It's a family enterprise ,
half French and Thai that respects a limited production ,
in order to preserve a true quality of handcraft .

These precious incenses have the particularity
to burn naturally ,
without any use of wood or coal .

Therefore the unpleasant smell of smoke is absent
and all the perfumes can completely express themselves .

We use natural plants , flowers , herbs , spices
and resins to create these incenses ,
mainly from organic crops .

Incenses dry naturally under the sun
so they can keep all their energy by avoiding
the use of an oven with high temperatures .

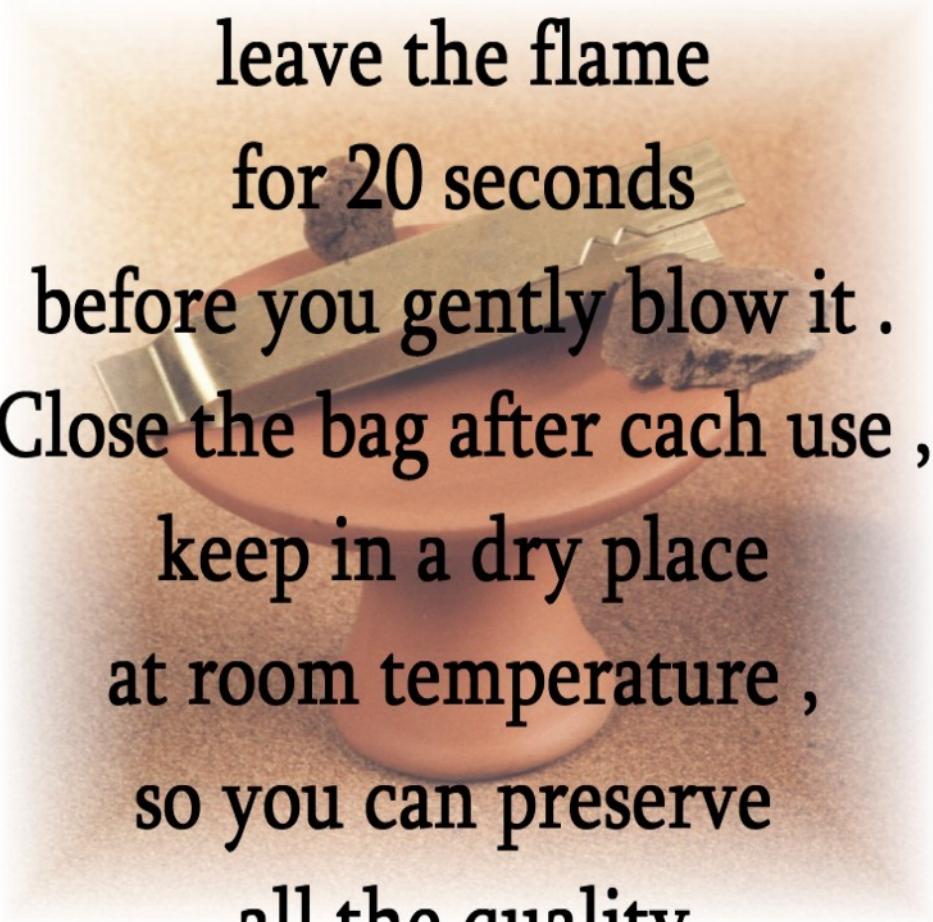

The material is mixed only with rain water
and for certain type of incenses ,

we then add essential oils pure or organic .

The absolute attention to the quality of the products
we use and the ancient know how guaranty
a complete satisfaction with these pure incenses .

All the village team thank you for your interest
in their craft and wish you lot of pleasure
with the use of these magic perfumed curls .

D.V.F creation Ltd Partnership tel : 01-9224908

A photograph of a terracotta incense burner with a piece of incense and a lighter on top. The burner is a simple, rounded shape with a pedestal base. The incense is a rectangular block, and the lighter is a standard Zippo-style lighter. The background is a soft, out-of-focus light brown.

Light with a lighter
one side of the incense ,
leave the flame
for 20 seconds
before you gently blow it .
Close the bag after each use ,
keep in a dry place
at room temperature ,
so you can preserve
all the quality
of your incense .
